13:30 Start of the Orange Wave – ½ mile

14:00 Start of the White Wave – 1 mile

14:30 Start of the Red Wave – 1 mile

SWIM CAP & TIMING CHIP

Swim Cap

Your coloured swim cap corresponds to the coloured wave you are in.

These items are strictly non-transferable to other great swim events or swimmers.

If you have any queries please get in touch sooner rather than later at info@greatswim.org

Timing Chip

This is your unique timing chip assigned to give you your time as well as let the swim tracker team know exactly when you enter and exit the water. Only you must wear it on the day.

YOUR WETSUIT

A wetsuit will give you extra buoyancy and warmth, but please make sure it fits properly as ill-fitting wetsuits are not allowed for safety reasons.

Wetsuit use is optional at all Great Swim events in water temperatures of 15°C or above.

Swimmers choosing not to wear a wetsuit **MUST** use an approved high visibility tow float. This only applies to swimmers aged over 16 years old.

Swimmers aged under 16 will be required to wear a wetsuit.

Baggage

Baggage drop is located in the Swim Village. Don't forget to bring your baggage label with you, already completed with your details. You will be able to make use of a heated changing marquee on the event site, with separate male and female changing areas

Start Area

There is no need to check in with our information team when you arrive on site, you will be checked in and have your timing chip tested when you enter the start area.

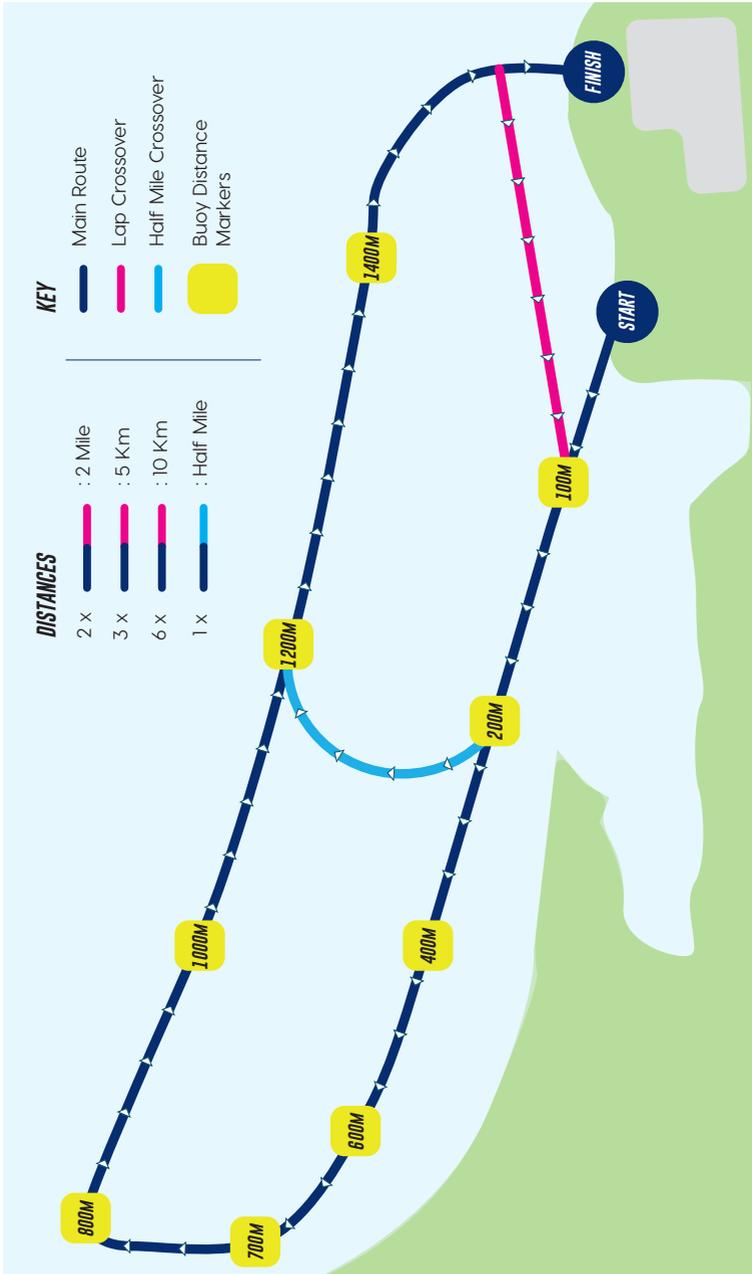

The start area will open immediately after the wave in front has been set off. No spectators will be allowed in this area.

There will be a marked area, supervised by lifeguards, where swimmers can acclimatise to the water temperature prior to the start of each wave. All swimmers will be called out of the water 10 minutes before their wave gets underway.

Before the start of each wave there will be a warm up and a safety briefing. This will include important information about the course and what to do if you get into difficulty.

When you hear the hooter go, please be patient. Your timing chip does not activate until you go under the start gantry so you will receive a completely accurate finish time. You can run or walk into the water, but please keep to the rear of your coloured wave if you want to walk.

IN THE WATER & AT THE FINISH

In the water

If you need assistance while in the water do not panic. Tread water and raise one arm in the air. We have plenty of safety craft on the water and someone will reach you as quickly as possible. We hope you don't need them, but there is a full medical team consisting of doctors, paramedics and first aiders at the event.

At the finish

Your swim time will stop when you leave the water and walk over the timing mat. Keep moving on to the check-out point where you will officially be checked-out and your chip will be collected.

Finishers' packs will be sorted by t-shirt size and will include a bottle of Aqua Pura water, your medal and other treats. Please take the pack that matches the t-shirt size you chose when you entered the event.

The swim village is open to everyone and features a range of activities and exhibitors for everyone to enjoy. Be sure to pop in to check out the stands.

Official Great Swim photographers will be there to capture some of your proudest moments. Visit greatswim.org/photos and follow links to your own Great Swim photo album.

HAVE A HAPPY & HEALTHY SWIM

Swimming in cold water can put additional stress on your body so it is important to check that you are fit to train and compete in the event

You must be able to swim more than the distance of the event you have entered non-stop in a pool by the day of the swim.

If you are unwell in the days before the event, even if you are raising money for charity, please don't swim. Most medical emergencies occur in people who have been unwell but don't want to miss out on the event.

Swimming is no different to other exercise – as you increase your activity level, your body temperature increases and you lose body fluid leaving to dehydration and impaired performance. This can be exacerbated when wearing a wetsuit, particularly on hot days.

Ensure you drink little and often before your swim and rehydrate well afterwards. Do not drink any alcohol the night before and on the day of the event as it can cause dehydration.

Some of the main risks associated with open water swimming are related to the effects of cold water. If your core temperature drops too low, you could suffer from hypothermia, which can be very serious.

If the water temperature is cold, wear an additional swim hat under your official Great Swim hat, preferably neoprene. It could also be worth investing in some neoprene socks and gloves for colder water temperatures.

On a hot day, do not put your wetsuit on fully until just before you go through check-in to avoid dehydration.

Fancy Dress

Sorry but we can't accommodate fancy dress that would compromise the safety of either the swimmer themselves or others.

Swimming Aids

Swimming goggles are recommended. Other aids such as diving masks, snorkels, MP3 players and flippers are not allowed.

Water Quality

All of our venues are tested for water quality, however swimming in open water does carry a risk of infection. Here are some simple steps you can take to reduce the risk:

- Cover any cuts and abrasions, however minor
- **Try not to swallow water while swimming**
- Wash hands in fresh water before eating after your swim
- **Take a full shower at the earliest opportunity; if you feel unwell for a period of up to three weeks after your swim, visit your GP and advise them you have been swimming in open water**

***GOOD LUCK AND ENJOY YOUR DAY FROM
THE GREAT SWIM TEAM AND
ALL OUR PARTNERS.***
